It is early time teachers in Uganda to change from chalk board work

to technology because it is a way to go ,machines like computers and

projectors can do chalk board work very well,effective and time saving

so let us join hands and thank the ITCT Africa organization in Uganda for

the effort,time,money and all the materials they have put in to up lift us teachers

in Uganda this was a dream but it is becoming true .when teachers are invested with the technology skills

and properly used it will be beneficial to our young farmers,doctors,traders

and every body.let me assure the management of ITCT AFRICA that the skill you have

given us is not going to stop here but it is a spear for us to start looking and hunting

fresh meat every where in Uganda thank you God bless you
