Am privileged being in training in IT with ITCT <http://www.itct-africa.org> here in Kampala.

The training is timely !

The training is tailor-made as IT is in real life situations and here to stay !

The training has gone far to empowering us (TEACHERS) in using IT not only as a personal requisite but even as a teaching learning tool.

The coverage has also helped me in managing my personal documents through the packages of database and excel.

I have also managed to make a PowerPoint (impress) presentation on the topic "**Uganda@50**". I can share it with you on a request note at my email ID

Am in plan to put to use the computer lab at my school by designing a timetable fitting my school setting.

Additionally, am contacting a secondary school near my home place to allow me offer lessons in IT not only in the school system but even to the teachers.

TIMELY TRAINING !

An outreach to the community through different public organizations and government personnel/workers ,offering them the knowledge I have so far attained is also in plan.

Am looking forward to other colleagues with interest in IT to link up with me so that I have the programs above realised.

BBOSA K.M. Billy.
