{jcomments on}

I was selected to participate in the ITCT Africa training workshops for six month lasting a week each a number of very interesting topics were covered. The facilitators were very supportive and friendly. It was my very first time to participate in an online training session. On Monday we had a very interactive training by Dr. Justine Magambo in Cologne Germany while we were in Kampala Uganda. It was amazing. All in all I have gained a lot of skills that obviously am going to share with my fellow tutors back at college and my students. I believe these skills will help me write lots of books and articles. Am grateful to the staff of ITCT Africa especially Charlotte and Rogers
